THE HR&OB SOCIETY, FMS DELHI

THE CV PROMPT BUS

EIGHT STOPS TO A PI-READY CV

How to Use

Your CV is the script for your PI. Every point on it is a question waiting to be asked, so it has to be sharp, honest and easy to defend. These prompts help you write, polish and check your CV with any AI tool, without letting it invent or stretch anything. Hop on at whichever stop you need.

1. Copy the prompt you need and paste it into ChatGPT, Claude or Gemini.
2. Fill in your details at the end of the prompt. Raw notes are fine.
3. Check every number and claim before it goes on your CV. You should be able to defend each one in a PI.

Category A: Writing Your Points

01. Write New CV Points (Page 3)
Use it when you need fresh points for any section, starting from raw notes and real numbers.

02. Improve Existing CV Points (Page 4)
Use it when your points are already on the CV and need polishing, without changing the facts.

03. Turn Your Summer Internship into CV Points (Page 5)
Use it when you have finished your summer internship and need to turn your project into strong CV points.

04. Write Points for Competitions and Case Wins (Page 6)
Use it when you have competition wins or finals and want them written as sharp Co-Curricular points.

Category B: Reviewing Your CV

05. Rank the Spikes Ribbon (Page 7)
Use it when you want to know which spikes are strongest and whether better ones are hiding in your CV.

06. Check CV Balance (Page 8)
Use it when you want to see if points are spread well across sections, so the CV is not top, middle or bottom heavy.

07. Plant Breadcrumbs for the Panel (Page 9)
Use it when you want the panel to ask about stories you are ready for, instead of random questions.

08. Final Proofread and Format Check (Page 10)
Use it when your CV content is final and you want one last check before you submit on Superset.

Prompt 01: Write New CV Points

Use it when: you need fresh points for any section, starting from raw notes and real numbers.

The Prompt

I am making my CV for final placements at FMS Delhi. Help me write new points for the section I mention below. If a rule can't be met with the facts I give, tell me.

Rules:

1. Length: 105 to 120 characters including spaces, so each point fills one full line on Superset. Verify counts with code and show the count in brackets.
2. Sections: Industry Experience (Responsibilities and Achievements), POR, Projects, CCA, ECA, Interests.
3. Quantify every point with baseline vs achieved ("from X to Y" or "X vs Y base"), with the number in the first half. Write [ASK] if a number is missing.
4. Start with a power verb. Follow Action + Task + Result in plain English that doesn't read as AI-written.
5. Plain text, no markdown. After each point, add a line "Bold:" with the key number to bold (max 2 spans).
6. Interests: 3 to 4 specific ones I can discuss for 10 minutes. For each, give 3 likely PI questions and 4 to 5 news items from the last 6 months, with source and date.

Do not: invent or inflate facts, claim team results as individual work, pad with filler, start with a number, "I", "Responsible for", "Worked on" or "Helped", use vague words, jargon or em dashes, repeat a number or verb, or include confidential data.

End with any [ASK] gaps and points a panel could probe hard.

Samples (copy the style, never the content or numbers):

Grew monthly dealer billing from Rs 1.2 Cr to Rs 1.8 Cr in 2 quarters by reworking beat plans for 14 key retailers (114)
Bold: Rs 1.2 Cr to Rs 1.8 Cr
Raised fest sponsorship from Rs 4 L to Rs 7 L by pitching 25 brands and bundling on-ground activation packages (110)
Bold: Rs 4 L to Rs 7 L
Interests: Formula 1 Race Strategy | Indian Space Startups | Specialty Coffee Supply Chain

My input:

Target role:
Section:
Organisation, role, dates:
What I did:
Baseline and achieved numbers:
Points needed:

Prompt 02: Improve Existing CV Points

Use it when: your points are already on the CV and need polishing, without changing the facts.

The Prompt

I am making my CV for final placements at FMS Delhi. My points are already on the CV. Help me improve how they read without changing what I did. If a rule can't be met with the facts I give, tell me.

Rules:

1. Length: 105 to 120 characters including spaces. Verify counts with code and show the count in brackets. Interests are one line with no limit.
2. Start with a power verb in past tense (present tense only for a current role). Follow Action + Task + Result.
3. Put the key number in the first half as "from X to Y" or "X vs Y base".
4. Use plain English with no jargon and no full stop at the end. Write Rs, not the rupee symbol.
5. Bold only the key number, max 2 spans. Never bold verbs, names or titles.
6. Do not repeat a number, verb or achievement. Achievements must not outnumber Responsibilities. In POR, do not repeat the role title.

Guardrails:

- Use only facts already in my points. Never invent, round up or add a number. Write [ASK] if a baseline is missing.
- Keep scope and ownership the same: "supported" stays "supported" and a team result stays a team result.
- Keep titles, dates and organisation names exactly as given.
- Do not add, delete, merge or move points unless I ask. If a point already follows every rule, write "No change".
- No confidential data, em dashes, markdown, "I", "Responsible for", "Worked on" or "Helped".

Output for each point:

Original:
Improved: (character count)
Bold:
Why: one short line

End with [ASK] gaps, points a panel could probe hard, and any repetition across sections.

Example (copy the method, never the content):

Original: Worked on beat plans for 14 key retailers which helped increase monthly billing from Rs 1.2 Cr to Rs 1.8 Cr in 2 quarters
Improved: Grew monthly dealer billing from Rs 1.2 Cr to Rs 1.8 Cr in 2 quarters by reworking beat plans for 14 key retailers (114)
Bold: Rs 1.2 Cr to Rs 1.8 Cr
Why: Verb first, result moved to the first half, removed "worked on" and "helped"

My details:

Target role:
Section (and Responsibilities or Achievements):
Organisation, role, dates:
Existing points:

Prompt 03: Turn Your Summer Internship into CV Points

Use it when: you have finished your summer internship and need to turn your project into strong CV points.

The Prompt

I am making my CV for final placements at FMS Delhi. Help me turn my summer internship into CV points. If a rule can't be met with the facts I give, tell me.

Step 1: Read my notes and list the 3 to 5 strongest things I did, with the number behind each. Ask me for anything missing, all at once, before you write.

Step 2: Write the points using these rules:

1. Length: 105 to 120 characters including spaces. Verify counts with code and show the count in brackets.
2. Start with a power verb in past tense. Follow Action + Task + Result, with the key number in the first half.
3. Use baseline vs achieved where there is an outcome. Where there is none yet, show scope (SKUs, stores, regions, interviews, data points).
4. Mark projected impact as projected, estimated or proposed. Never write a recommendation as an achieved result.
5. Show what the company did with my work (adopted, piloted, presented to leadership) only if it actually happened.
6. Mention a PPO or PPI only if I received one.
7. Plain text, no markdown. After each point, add a line "Bold:" with the key number to bold (max 2 spans).

Do not: claim my mentor's or team's work as mine, share confidential data (internal revenue, client names under NDA, unreleased products), or use em dashes, "I", "Responsible for", "Worked on" or "Helped". If a number is confidential, suggest a safe form like a percentage or index.

End with [ASK] gaps and 3 questions a panel is likely to ask about my internship.

Samples (copy the style, never the content or numbers):

Projected margin rise from 18% to 22% on 40 SKUs by building a pricing model the brand team adopted for Q3 launch (113)
Bold: 18% to 22%
Cut report prep time from 6 hours to 40 minutes a week by building an automated sales tracker for 9 regional managers (117)
Bold: 6 hours to 40 minutes

My input:

Target role:
Company, division, dates:
Project title and problem statement:
What I did (raw notes are fine):
Numbers (baseline, scope, result, projected impact):
What the company did with my work:
PPO or PPI (if any):
Points needed:

Prompt 04: Write Points for Competitions and Case Wins

Use it when: you have competition wins or finals and want them written as sharp Co-Curricular points.

The Prompt

I am making my CV for final placements at FMS Delhi. Help me write Co-Curricular points for the competitions and case challenges I won or placed in. If a rule can't be met with the facts I give, tell me.

Rules:

1. Length: 105 to 120 characters including spaces. Verify counts with code and show the count in brackets.
2. Each point shows my rank, out of how many teams, the organiser, and the winning idea in a few words. Rank and field size go in the first half.
3. Use the exact rank I give. Never turn "finalist" into "winner" or "top 10" into "top 5". If the number of teams is missing, write [ASK].
4. Order the points by strength: rank, field size, organiser's brand, then fit with my target role.
5. Credit team results to the team. Mention my own part only if I clearly owned it.
6. Suggest which small wins can be grouped into one point and which are too weak to keep.
7. Plain text, no markdown. After each point, add a line "Bold:" with the key number to bold (max 2 spans).

Do not: list participation as an achievement, use only a fest or event nickname without saying what the contest was, repeat a verb, or use em dashes.

End with [ASK] gaps, any win a panel may question, and 2 likely PI questions per point about the winning idea.

Samples (copy the style, never the content or numbers):

Won 1st place among 850+ teams in a national FMCG case contest by pitching a Rs 10 refill pack for Tier 2 towns (111)
Bold: 1st place among 850+ teams
Reached top 8 of 2,300+ teams in a consulting case challenge by redesigning delivery routes to cut costs by 12% (111)
Bold: top 8 of 2,300+ teams

My input:

Target role:
Competition name, organiser, year:
Rank and number of teams:
Rounds cleared:
Winning idea in 2 lines:
My role in the team:
Prize or recognition (cash, PPI, etc.):

Prompt 05: Rank the Spikes Ribbon

Use it when: you want to know which spikes are strongest and whether better ones are hiding in your CV.

The Prompt

I am making my CV for final placements at FMS Delhi. Help me review the Spikes Ribbon on my CV. The ribbon is one line with my best academic, professional and extracurricular highlights, and interviews often start from it.

1. Rank my current spikes from strongest to weakest. Score each out of 10 based on:
   - Rarity: how few people in my batch can claim it
   - Proof: a clear number, rank or baseline
   - Relevance: fit with my target role
   - Defensibility: I can talk about it for 5 minutes in a PI

   Give one short line on why each spike got its rank.
2. Suggest up to 3 better spikes, picked only from achievements already in my CV. For each, say which current spike it replaces and why it is stronger.
3. Give the final ribbon as one line, with spikes separated by " | ".

Rules:

- Keep the same number of spikes as my current ribbon. Each spike is short, around 3 to 6 words, and includes its number.
- Keep a mix: at least one professional spike and one academic or extracurricular spike.
- Skip anything most of the batch can also claim, like a CAT percentile, unless it is clearly rare.
- Do not pick two spikes that say the same thing.
- Keep the context a number needs, like "out of how many" or "in how long".
- Use only facts and numbers already in my CV. Never invent, round up or stretch a claim.
- The final ribbon must fit on one line of the FMS template.
- Plain text only, no em dashes, no markdown.

Target role or domain:
Current Spikes Ribbon:
My full CV (paste or attach):

Prompt 06: Check CV Balance

Use it when: you want to see if points are spread well across sections, so the CV is not top, middle or bottom heavy.

The Prompt

I am making my CV for final placements at FMS Delhi. Help me check whether my CV is balanced across sections. A balanced CV shows strength across work experience, MBA years and activities, and is not top heavy (only work experience), middle heavy (only projects and PORs) or bottom heavy (only competitions and activities).

1. Count the points in every section: Industry Experience (Responsibilities and Achievements separately), POR, Projects, Co-Curricular, Extra-Curricular. Show each section's count and its share of total points.
2. Give one verdict: Balanced, Top heavy, Middle heavy or Bottom heavy, with a one-line reason.
3. Check inside each section:
   - A role must not have more Achievements than Responsibilities
   - The strongest point comes first in each block
   - No section has just 1 point unless that is clearly enough
   - No two points, in any section, repeat the same skill, number or story
   - First-year MBA work (summer internship, PORs, competitions, projects) is visible for final placements
4. Suggest fixes to balance the CV:
   - Cut: the weakest points in heavy sections, and why
   - Move: a point that fits another section better, only if it matches that section's definition
   - Add: what kind of point a thin section needs, marked [ADD]. Do not write the point itself.

   Every point added must be matched by a point cut, so the CV stays one page.
5. Give the suggested final count for each section, and say how it fits my target role.

Rules:

- Use only points already in my CV. Never invent facts, numbers or achievements.
- Judge balance against my profile: a candidate with work experience and a fresher need different splits.
- Plain text only, no em dashes, no markdown.

Target role or domain:
Work experience (months):
My full CV (paste or attach):

Prompt 07: Plant Breadcrumbs for the Panel

Use it when: you want the panel to ask about stories you are ready for, instead of random questions.

The Prompt

I am making my CV for final placements at FMS Delhi. Help me plant breadcrumbs in my CV. A breadcrumb is a specific detail in a point that makes the panel curious enough to ask about it, and leads to a story I want to tell. The goal is to steer my PI toward my strongest stories.

Step 1: Read my CV. List the points that already work as breadcrumbs and the question each will likely trigger.

Step 2: Ask me 5 to 6 short questions, all at once, about the stories behind my points that the CV does not show yet: a surprising finding, an unusual method, a hard trade-off, a conflict I solved, a call I made against the obvious choice. Wait for my answers.

Step 3: For up to 5 points, suggest a rewrite that plants a breadcrumb. For each, give: Original, With breadcrumb (character count), Likely question, and Story it leads to (one line).

Step 4: Flag accidental breadcrumbs: details that may pull the panel toward weak areas, like a gap, a low score, a tool I can't use well, or a term I can't explain. Suggest whether to remove each or prepare for it.

Rules:

- A breadcrumb is a specific, slightly unusual detail: an odd number, a named constraint, a counterintuitive method or a surprising finding. Never a buzzword.
- Use only facts I have shared. Never add a detail just to make a point interesting.
- Each breadcrumb must lead to a story I can defend for 5 minutes with numbers.
- One breadcrumb per point at most, 5 to 6 across the CV, spread across sections.
- Keep points at 105 to 120 characters. Verify with code.
- Plain text only, no em dashes, no markdown.

End with my top 5 breadcrumbs in the order I should practise the stories.

Example (copy the method, never the content):

Original: Raised store sales from Rs 8 L to Rs 11 L a month by changing shelf layout and training staff at 6 outlets (106)
With breadcrumb: Raised store sales from Rs 8 L to Rs 11 L a month by moving one fast seller to eye level across 6 outlets (105)
Likely question: Which product, and why did one move matter so much?
Story it leads to: Sales data showed one item drove most baskets, so placement mattered more than staff training

Target role:
My strongest stories (optional):
My full CV (paste or attach):

Prompt 08: Final Proofread and Format Check

Use it when: your CV content is final and you want one last check before you submit on Superset.

The Prompt

I am making my CV for final placements at FMS Delhi. My content is final. Help me do a last check for errors before I submit. Do not rewrite my points. Only flag problems and give the exact fix.

Check:

1. Spelling and grammar. Flag any mix of UK and US spelling.
2. Tense: past tense for finished roles, present tense only for a current role.
3. Length: every point between 105 and 120 characters. Verify with code and list any point outside the range with its count.
4. Number format: Rs (not the rupee symbol), L and Cr written the same way everywhere, commas in numbers above 999, no number repeated across points.
5. Dates: one format throughout, no overlaps that don't add up, and total work experience matches the months I give below.
6. Bold: only key numbers, max 2 spans per point, never verbs, names or titles.
7. Repetition: no starting verb used twice, no story told twice.
8. Punctuation: no full stop at the end of points, no em dashes, "and" or "&" used the same way throughout.
9. Names: organisations, titles and products spelled exactly as they officially are.
10. Acronyms: flag any a panel outside my industry may not know.
11. Confidential data: flag client names or internal numbers that may be under NDA.

Output for each problem:

Issue:
Where:
Fix:

Then list the checks that passed. End with the 3 most serious problems to fix first.

Rules: Do not change facts, numbers or meaning. Do not suggest style rewrites unless a point breaks a rule. Plain text only, no em dashes, no markdown.

Work experience (months):
Spelling style (UK or US):
My full CV (attach the PDF so bold can be checked, or paste the text and mark bold parts with *):
